

**School of Human Ecology**  
Ambedkar University Delhi

## **Online Masterclass Series**

# **CRITICAL AGRARIAN STUDIES**

The Masterclass series aims to bring together eminent academics working on rural/agrarian issues in the Global South. We see the speakers in the role of teachers for advanced Masters students and MPhil/PhD scholars. We expect them to use insights from their own work to help students understand how they worked through different theoretical frameworks to arrive at the one(s) that they find most useful for their own field. The Masterclass will thereby provide students with a broad sweep of disciplinary and theoretical perspectives on the chosen theme, and help them to connect these with the lived realities of agrarian/rural societies from the speaker's own sites. It will also help them to engage critically with key policies that are related to the theme.
